

PETRONAS

KEEP YOUR INNER COOL

PETRONAS SYNTIUM

Fights Excessive Engine Heat

PETRONAS Syntium with °CoolTech™ technology targets and cools critical parts deep within the engine, for optimal performance.

Oil Developed For

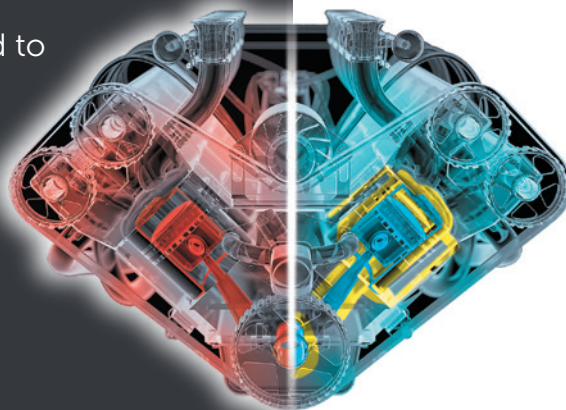

THE STORY OF EXCESSIVE ENGINE HEAT

Most drivers are not aware of excessive engine heat build-up that happens every day deep inside their engines. The problem is caused by modern day driving conditions; such as traffic congestion, driving up steep inclines, and acceleration on highways.

This excessive heat can lead to serious engine damage, which reduces the engine parts' life and accelerates oil breakdown.

Excessive engine heat can occur regardless of the external weather.

PETRONAS SYNTIUM WITH °COOLTECH™

Choosing the right lubricant is very important to reduce excessive engine heat to prevent engine damage. PETRONAS Syntium with °CoolTech™ is designed to defend against excessive engine heat for optimum performance.

PETRONAS SYNTIUM 7000 HYBRID 0W-20

SPECIFICATIONS & APPROVALS*

MEETS OR EXCEEDS THE REQUIREMENTS OF	API SN PLUS, ILSAC GF-5, DEXOS 1 GEN 2
